

Hawaiian Topical Dictionary

Hawaiian to English, arranged by part of speech, then by category, then alphabetically.

How to use this book

Each section is a part of speech (nouns, verbs, adjectives, and so on), with phrases as their own section at the end. Within a section, words are grouped into categories such as Animals or Motion & Travel, and listed alphabetically. The ‘okina and kahakō are ignored when alphabetizing.

A word used as more than one part of speech is defined in each section, with a note such as [also v.]. A word that fits more than one category is listed in each, with a note such as [also in Plants]. When a word has more than ten meanings, the first ten appear in the entry and the rest are in the Appendix.

† marks an unverified spelling: the word could not be confidently matched to a spelling with ‘okina and kahakō, so it appears as printed in the 1887 source, without them.

Sources. The word list and meanings are drawn from H. R. Hitchcock, *An English-Hawaiian Dictionary* (1887, public domain), reversed so the Hawaiian leads. Spellings were checked against Pukui and Elbert's *Hawaiian Dictionary*. About three hundred common words missing from Hitchcock were added, with definitions written for this book. Entries were produced by OCR and automatic processing, so errors remain; check important words against a standard dictionary.
